### Zirlux FC2 Universal ZR System for all Indications

**DATE:** May 11, 2013  
**TIME:** 12:30pm – 2:00pm  
**CREDITS:** 1.5 CDT

**Location:** Renaissance Orlando at SeaWorld  
Orlando, FL

#### BRIEF COURSE DESCRIPTION:

The Zirlux FC Universal ZR system is ideal for producing exceptionally esthetic high translucency full contour restorations by using the unique pre-shaded Zirlux FC2 high translucency discs and Zirlux FC2 stains. Laboratories today have the opportunity to provide this unique system that matches and looks better than natural teeth. The lecture will review the highly efficient staining process used to reach A-D and bleach shades by using the appropriate shade of Zirconia and coordinated stains. Most final shades achieved in a single stain and glaze firing! The instructor will teach the process and show participants how the Zirlux FC2 Zirconia discs are compatible with the Zirlux LC layering ceramic for superior results.

**Instructor:** Robert Michael, Master CDT, BSc

Robert Michael holds a Master CDT certification in Dental Ceramics his experience covers

all phases of the dental laboratory industry including fixed and removable prosthesis.

Robert Michaels dedicates his time to work with laboratories and teach technical classes worldwide.
